

DETAILED ACTION

Election/Restrictions

1. Newly submitted claims 39-52 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: new claims 39-52, and previously presented claims 19, 22, 24-29 and 38 are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the previously presented subcombination claims required an input flow flange (claim 19) or a spindle (claims 19, 29 and 38), neither of which is required of the newly presented subcombination claims. The subcombination has separate utility such as in an apparatus not comprising a pressure vessel (the previous invention is drawn to a valve).
2. Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 39-52 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

3. Since the above-mentioned amendment appears to be a *bona fide* attempt to reply, applicant is given a TIME PERIOD of ONE (1) MONTH or THIRTY (30) DAYS, whichever is longer, from the mailing date of this notice within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD UNDER 37 CFR 1.136(a) ARE AVAILABLE.
